IDENTIFIERS,

ABSTRACT

The data in this report were obtained from the survey of "Degrees and Other Formal Awards Conferred Between July 1, 1971 and June 30, 1972" conducted by the National Center for Educational Statistics (NCES). This survey was part of the seventh annual Higher Education General Information Survey (HEGIS). Contained in this report are institutional and summary data on bachelor's and higher degrees. Included are summary tables by level or degree, discipline specialty, sex of degree recipient, state and control and level of institution. Comparisons are made with data for earlier survey years. There are also three tables containing data from each of the 1,658 institutions represented in the survey. (Author/KE)

#### HIGHLIGHTS OF THE DATA

- 1. More than 1.2 million (1,224,027) degrees were conferred at the bachelor's and higher levels in 1971-72 by 1,658 institutions of higher education in the United States. This was an increase of 76,042 degrees (or about 6.6 percent) over the 1,147,985 awarded in 1970-71 by 1,644 institutions.
- 2. Publicly controlled institutions awarded 66 percent of all degrees in 1971-72, up from 65 percent in 1970-71. The number of degrees awarded by these institutions increased by 8 percent in 1971-72. For privately controlled institutions, the corresponding increase was 4 percent.
- 3. In 1971-72, publicly controlled institutions awarded 67 percent of all bachelor's degrees, 43 percent of all first-professional degrees, 66 percent of all master's degrees, and 65 percent of all doctor's degrees. This was largely unchanged from 1970-71, when they awarded 66, 43,-66, and 65 percent, respectively.
- 4. Men received 59 percent of all degrees in 1971-72 and 59 percent in 1970-71. At the various degree levels, the proportions of degrees awarded to men changed very little from 1967-68 to 1971-72.
- 5. For the largest discipline divisions, in terms of the number of degrees conferred:
  - 54 percent of all bachelor's degrees were in education (192,368), social sciences (159,594), and business management (123,306):
  - 58 percent of all master's degrees were in education (98,280), business management (30,511), and social sciences (17,469).
  - 45 percent of all doctor's degrees were in education (7,041), physical sciences (4,103), and social sciences (4,079).
- 6. In specific discipline specialties, elementary education had the highest number of degrees at the bachelor's and master's levels, law, at the first-professional level; and chemistry, at the doctor's level. The same field at each level has been reported as ranking first in each annual survey since 1964-65.
- 7. All institutions to which the survey instrument was sent responded to the request for data. This is the fourth consecutive year in which a 100-percent response was obtained in this survey.

#### **FOREWORD**

This publication on earned degrees conferred by institutions of higher education in the United States is based on the survey instrument "Degrees and Other Formal Awards Conferred Between July 1, 1971 and June 30, 1972," part of the seventh annual Higher Education General Information Survey (HEGIS) conducted by the National Center for Education Statistics.

The tables in this report provide data on baccalaureate and higher degrees. Detailed information on awards below the bachelor's level will be presented in a separate report entitled Associate Degrees and Other Formal Awards Below the Baccalaureate, 1971-72.

Mrs. Mary Evans Hooper was the survey director responsible for the conduct of the survey and the preliminary analysis of the data. Mrs. Agnes Q. Wells provided technical assistance. After the retirement of Mrs. Hooper, Mr. Curtis O. Baker served as survey director and Mrs. Wells became associate survey director.

The cooperation of the college and university officials who supplied the institutional reports has made possible a 100-percent response rate. The continued efforts and interest of the survey respondents are deeply appreciated.

Theodore H. Drews, Acting Director Division of Survey Planning and Analysis Edith M. Huddleston, Acting Chief Higher Education Surveys Branch

#### ERRATUM: Earned Degrees Conferred, 1971-72

#### INTRODUCTION

The data in this report were obtained from the survey of "Degrees and Other Formal Awards Conferred Between July 1, 1971 and June 30, 1972" conducted by the National Center for Education Statistics (NCES). This survey was part of the seventh annual Higher Education General Information Survey (HEGIS). Contained in this report are institutional and summary data on bachelor's and higher degrees. (Detailed information on awards below the bachelor's level is presented in a separate series, entitled Associate Degrees and Other Formal Awards Below the Baccalaureate.)

Included in this publication are summary tables by level of degree, discipline specialty, sex of degree recipient, State, and control and level of institution. Comparisons are made with data for earlier survey years. There are also three tables containing data from each of the 1,658 institutions represented in the survey: One summarizes the degrees conferred by each institution, by level of degree and sex of student, the other two, which make up the bulk of this publication, list the number of degrees conferred within each discipline specialty at each institution, one at the bachelor's, master's, and doctor's levels and the other at the first-professional level. The data on intermediate degrees that have been gathered for 1970-71 and 1971-72 are also presented.

A copy of the portion of the 1971-72 report form (parts A and B) pertaining to bachelor's and higher degrees, together with definitions and instructions to respondents, is reproduced in the appendix. Also included in the appendix are data on intermediate degrees (page 27 of the report form). (Note.—The remainder of

the report form (part C) concerns awards below the bachelor's level.) The totals shown in the data cells on the facsimile form are those obtained for the aggregate United States.

Survey data on bachelor's and higher degrees may be considered comparable for the years 1965-66 through 1969-70. When making comparisons for years before 1965-66, care must be exercised because degree levels were redefined for the 1965-66 survey. (For a detailed description of the differences between the 1965-66 survey and earlier surveys, see *Earned Degrees Conferred*, 1965-66 (OE-54013-66).) Beginning in 1970-71, the survey utilized the classification of fields of study in A Taxonomy of Instructional Programs in Higher Education (OE-50064). A copy of that taxonomy was reproduced in appendix B of Earned Degrees Conferred 1970-71 (OE-73-11412).

The introduction of the new field classification system beginning with the 1970-71 survey means that any comparisons with data for previous years should be made with care. A degree of comparability is possible through the use of a "translation table." However, the addition of new fields, together with the changed distributions and descriptions of fields formerly included, has changed the classification base to such an extent that in many cases significant comparisons would be impossible. For example, Trade or Industrial Training, which was an area of study in the 1969-70 survey (code 8000), is now shown under Engineering technologies (code 0925), as part of the discipline division of Engineering.

### SURVEY COVERAGE AND METHODOLOGY

#### Institutions Included

This report is based on data furnished by 1,658 institutions of higher education in the United States and outlying areas ("aggregate United States"). These constitute all of the institutions in the NCES higher education survey universe that, as far as NCES could determine, conferred bachelor's or higher degrees during the period from July 1, 1971, through June 30, 1972. The survey universe for earned degrees is based on the list of institutions included in the Education Directory, 1970-71, Higher Education (OE-50000-71), with all additional changes that were known in the fall of 1971. The questionnaire "Degrees and Other Formal Awards Conferred Between July 1, 1971 and June 30, 1972"-part of the seventh Higher Education General Information Survey (HEGIS)—was sent to all institutions in this universe. Each institution was requested to supply data in all applicable parts of the survey-data on bachelor's and higher degrees as well as on awards below the bachelor's level. (The present report is confined to data on bachelor's and higher degrees.) Since each of the 1,658 institutions responded with complete survey data, it was unnecessary for NCES to make any imputations or to provide any estimates for data by sex of student, level of degree, or discipline specialty.

The number of institutions in the 1971-72 survey of earned degrees were as follows:

		Control	
Level of institution	<u>Total</u>	Public	Private
All institutions	1,658	438	1,220
Universities	160	95	65
Other 4-year	1,498	343	1,155

There were 14 more institutions in this survey in 1971-72 thanin 1970-71. Public other 4-year institutions added 7 institutions, and private other 4-year also increased by 7. The number of universities in both the public and private sectors remained the same for both years.

#### Verification of Data

To obtain complete and accurate data, the completed questionnaires were examined, analyzed, and reviewed for compliance with the instructions to respondents. The data were compared with available data reported by the respondents in questionnaires for previous surveys of earned degrees; reference was frequently made to institutional catalogs and other materials for descriptions of programs and criteria. When appropriate, institutions were contacted by letter or telephone to obtain verification or revision of reported data. In some instances, when the number of degrees reported in any area was significantly larger or smaller than the number reported in the previous survey year, institutions provided explanatory information.

The instructions on the survey form request that the institutions classify degrees according to major field of study and to do so as specifically as the lists of specialties in the broad-discipline divisions permit. For example, a student of educational psychology who is specializing in teaching the mentally retarded should be reported under "education of the mentally retarded" (code 0810), rather than in the somewhat broader category of "educational psychology" (code 0822) or in the broadest available category of "education, general" (code 0801). In practice, however, institutions can report data only to the level of detail provided in their individual recordkeeping systems. In some cases, therefore, readers may observe disparities between individual institutional programs as they know them and the manner in which they are shown in the institutional listings.

#### ORGANIZATION OF THE TABLES

The ten tables in this report have the same format as in the 1970-71 report. Separate counts are given by sex of student in all tables; other classifications vary from table to table.

Table 1 is a brief-historical comparison of degrees conferred, by level of degree, from 1966-67 through 1971-72. Table 2 is a summary of the degrees conferred in 1971-72 by level of degree and control and level of institution. In this table, data are presented separately for universities and for other 4-year institutions. Classified as universities are institutions that give considerable stress to graduate instruction, confer advanced degrees as well as bachelor's degrees in a variety of liberal arts fields, and have at least two professional schools that are not exclusively technological. Other institutions offering 4 or more years of college-level work, but not meeting the criteria for classification as universities, make up the "other 4-year" group. Tables 3, 3A, and 3B show State data-for each of the degree levels. Table 4 gives bachelor's, master's, and doctor's degrees by discipline division. Table 5 shows the same information as table 4 by discipline specialty within discipline divisions. Table 6 presents data on first-professional degrees conferred in eight selected discipline specialties. Table 7 summarizes degrees conferred by each institution in the survey, by

sex of student and level of degree; totals by State are also shown in this table. Table 8, which forms the bulk of this publication, gives the number of degrees conferred at the bachelor's, master's, and doctor's level in each discipline specialty by each institution. The institutions are listed alphabetically by State. Table 9 presents a similar listing for first-professional degrees. Table 10 summarizes intermediate degrees conferred in each of the two years, 1970-71 and 1971-72.

The following breakdowns of data may be obtained from the tables noted:

		Table number
1	. Control and level of institution	2
	. Control of institution

# DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE OFFICE OF EDUCATION WASHINGTON, D.C. 20202

HIGHER EDUCATION GENERAL INFORMATION SURVEY

# DEGREES AND DTHER FORMAL AWARDS CONFERRED BETWEEN JULY 1, 1971 AND JUNE 30, 1972

PLEASE READ INSTRUCTIONS BEFORE COMPLETING THIS FORM O.M.B. NO. 51-R0561 APPROVAL EXPIRES: 6/30/74

1. INSTITUTION CODE NUMBER

2. DUE DATE
Not later than August 15, 1972

Items 1, 3, 4, 5, and 6 MUST be completed by ell institutions. If applicable, complete items 7 and 8. Submit a separate survey form for each of the compuses or branch compuses of the institution. If it is impossible to provide separate date for any branch compus, and the date for that branch must be included in the parent institution's report, indicate this in item 8 below,

3 NAME AND BY THIS	ND MAILING 5 REPORT (	G ADDRESS OF INSTITUTION OR CAMPUS COVERE Include city, State, and ZIP code)	ED 4. NAME AND TITLE OF RESPONDENT
			5. TELEPHONE NUMBER OF RESPONDENT (Arca code, local number and extension)

## **DEFINITIONS**

MULTI-CAMPUS INSTITUTION. An organization bearing a resemblance to an institutional system, but unequivocally designated as a single institution with either of two organizational structures. (1) an institution having two or more campuses responsible to a central administration (which central administration may or may not be located on one of the administratively equal campuses) or (2) an institution having a main campus with one or more branch campuses\_attached to\_it.

MAIN CAMPUS. In those institutions comprised of a main campus and one or more branch campuses, the main campus (sometimes called the parent institution) is usually the location of the core, primary, or most comprehensive program. Unless the institution-wide or central administrative office for such institutions is reported to be at a different location, the main campus is also the location of the central administrative office.

BRANCH CAMPUS. A campus of an institution of higher education which is organized on a relatively permanent basis (i.e., has a relatively permanent administration), which offers an organized program or programs of work of at least 2 years (as opposed to courses), and which is located in a community different from that in which its parent institution is located. To be considered in a community different from that of the parent institution, a branch shall be located beyond a reasonable communing distance from the main campus of the parent institution.

INSTITUTIONAL SYSTEM. A complex of two or more institutions of higher education, each separately organized or independently complete, under the control or supervision of a single administrative body.

ORM 2300-2.1, 3/72

# DEGREES AND OTHER FORMAL AWARDS CONFERRED BETWEEN JULY 1, 1971 AND JUNE 30, 1972 SURVEY COVERAGE

This report is divided into 3 parts.

PART A is concerned with first-professional degrees only.

PART B is concerned with bachelor's, master's, and doctor's degrees.

PART C is concerned with awards below the bachelor's level (Associate in Arts degrees and other formal awards).

Many institutions will appropriately skip one or more of the 3 parts. If a particular part (A, B or C) does not apply to you, please indicate that fact and forward that part to us along with those you did complete.

Classification of the major fields of study used in this survey has been presented in the following publication:

U.S. Department of Health, Education, and Welfare, Office of Education, National Center for Educational Statistics. A Taxonomy of Instructional Programs in Higher Education.

By Robert A. Huff and Marjorie O. Chandler, OE-50064-70. Washington: U.S. Government Printing Office, 1970.

Price: \$ .45.

NOTE: Listings of data for individual institutions are regularly included in published reports of this survey.

#### **GENERAL INSTRUCTIONS**

- 1. INCLUSIVE DATES. Report only those degrees (including awards in Part C) which were actually conferred between July 1, 1971 and June 30, 1972. Degrees earned but not yet conferred during this time period should be reported in next year's survey.
- 2. INSTITUTIONAL COVERAGE. A separate report is requested from each branch or member of a system, as well as from each entirely independent institution and each "parent" institution. Please provide the information requested in item 6 on the cover page, which is intended to permit complete identification of the reporting unit. Do not include degrees conferred by branches of your institution located in foreign countries.
- 3. CONSULTATION ON PROBLEMS. If clarification of the definitions and instructions is needed, please consult the survey director, Mrs. Mary Evans Hooper, National Center for Educational Statistics, U. S. Office of Education, 400 Maryland Avenue, S.W., Washington, D.C. 20202. Or you may reach Mrs. Hooper by telephone: (202) 962-7301.

- 4. RETURNING FORMS. Completed report forms should be addressed: Attention: Room 2136-HEGIS, National Center for Educational Statistics, U. S. Office of Education, 400 Maryland Avenue, S.W., Washington, D.C. 20202.
- 5. MAJOR-CHANGES. If the number of degrees you report in any area is significantly larger or smaller than the number you reported last year, it will be most helpful if you-will include explanatory notes on the form or on an accompanying sheet of paper. Please indicate by circling the "line number" in column 3 if degrees were conferred for the first time in 1971—72 in a discipline specialty new to your institution.
- 6. Please verify your entries and check all the addition before returning the form.
- 7. SEPARATE SPECIFIC INSTRUCTIONS ARE PROVIDED FOR EACH OF THE 3 PARTS.

## INSTRUCTIONS FOR PART A: FIRST-PROFESSIONAL DEGREES CONFERRED IN SELECTED FIELDS, 1971-72

Only the 8 professions listed below should be reported in Part A. Within these professions, report first-professional degrees only. A first-professional degree is defined herein as one which meets all three of the following criteria:

(1) it signifies completion of the academic requirements to begin practice in the profession; (2) it is based on a program which requires at least 2 years of college work prior to entrance, and (3) a total of at least 6 academic years of college work is required to complete the degree program, including prior required college work plus the length of the professional curriculum itself.

The "Other" category is to be used only in the event that there are first-professional degrees within the 8 professions other than those specifically named in connection with those professions.

For each of the 8 disciplines, degrees other than first-professional are to be reported in Part B.

The TOTAL line (line 14) should show the sums of all entries in columns 4 and 5.

		LINE NO.		RST-PROFESSIONAL S CONFERRED	
CODE	DISCIPLINE SPECIALTY (major field of study)	(Circle if new this year)	MEN	WOMEN	
(1)	(2)	(3)	(4)	(5)

9799		10			
9799		11			
9799		12			
799		13			
9700	TOTAL (Sum of lines 1 thru 13)	14	41,021	2,753	

## INSTRUCTIONS FOR PART B: BACHELOR'S, MASTER'S, AND DOCTOR'S DEGREES

1. TYPES OF DEGREES. Report earned bachelor's, master's, and doctor's degrees, except for those first-professional degrees reported in Part A. Report certificates and diplomas if they are equivalent to a bachelor's degree and if they are based on at least 4 years of college work.

Do not report honorary degrees.

Certificates for work between the master's degree and the doctor's degree should be separately listed at the end of Part B. See 5(d) below.

(Report Associate in Arts degrees or similar awards below the bachelor's level in Part C.)

2. GROUPING OF DISCIPLINES. The major fields of study to be reported here fall in the following discipline divisions:

0100	Agriculture and Natural	1300	Home Economics
	Resources	1400	Law
0200	Architecture and En-	1500	Letters
	, vironmental Design	1600	Library Science
0300	Area Studies		
0400	Biological Sciences		
		1700	Mathematics
0500	Business and Manage-	1800	Military Sciences
	ment	1900	Physical Sciences
0600	Communications	2000	Psychology
0700	Computer and Infor-		
	mation Sciences		D 1 11 1 100 1 1
0800	Education	2100	Public Affairs and Services
0900	Engineering	2200	Social Sciences
	Fine and Applied Arts	2300	Theology
	Foreign Languages	4900	Interdisciplinary

3. SKIPPING INAPPLICABLE DISCIPLINES. Skip those discipline divisions in which your institution does not grant degrees. Many registrars, for example, will skip one or more of the following: 0100; 1200; 1800; 2300.

Studies

4. NUMBER OF DEGREES. Report all degrees (within the limitations of paragraph 1, above). If a student earned two degrees between July 1, 1971 and June 30, 1972 (e.g., a bachelor's degree at the end of the summer session and a master's degree at the end of the following academic year), report each of the two degrees in its appropriate classification.

#### 5. DEGREE LEVELS.

1200 Health Professions

(a) Report all BACHELOR'S DEGREES requiring at least 4 but not more than 5 years of academic work in Columns (4) and (5) of the report-form. Also, report ALL bachelor's degrees conferred in a COOPERATIVE or WORK-STUDY

- PLAN or PROGRAM in Columns (4) and (5). A cooperative plan provides for alternate class attendance and employment in business, industry, or government; thus, it allows the student to combine actual work experience with his college studies.
- (b) MASTER'S DEGREES. The master's degree in liberal arts and sciences is the degree customarily granted upon successful completion of one (sometimes two) academic years of work beyond the bachelor's degree.

Except-for the Master of Divinity degree (Part A), report-all master's degrees in Part B, Columns (6) and (7) (even though the master's is required in some fields, suck as Library Science, Hospital Administration, and Social Work, for employment at the professional level, and even though, as in the case of Social Work, 4 years of undergraduate work are required for entrance into the program and an additional 2 years for completion.) Report Education specialist (6-year degree) in same columns as master's degrees, in appropriate discipline specialty in Education (0800).

- (c) DOCTORATE. The doctorate classification includes such degrees as Doctor of Education, Doctor of Juridical Science, Doctor of Public Health, and the Ph.D. degree in any field whether Agronomy, Food Technology, Education, Engineering, Public Administration, Ophthalmology, Radiology, etc. (In the case of the Doctor of Public Health, the prior professional degree is generally earned in the closely related professional field of medicine or of sanitary engineering.) Please report the doctor's degrees (except those included in Part A) in Columns (8) and (9) of the report-form.
- (d) OTHER DEGREE OR CERTIFICATE. If your institution provides any recognition (degree or certificate) for a program intermediate between the master's degree and the doctor's degree (Ph.D., Ed.D., etc.) which in essence is the doctor's degree without the dissertation (for example, Master of Philosophy, Candidate:in. Philosophy, etc.) (do not include 6-year specialist degrees), please report the name of the degree or certificate and the number of students receiving it in the item at the end of Part B (after Item No. 9800.) (Do not include in the tabulated figures for Bachelor's, Master's, and Doctor's degrees in the report-form.)
- 6. CLASSIFICATION OF DEGREES ACCORDING TO MAJOR FIELD OF STUDY.
- (a) Specific Classification. Classify degrees as specifically as the list of specialties in the broad discipline divisions of the report form permits. Thus, report a bachelor's degree in business administration with an accounting major in Accounting (0502), NOT in Business and commerce, general (0501).
- (b) Degree of Doctor of Philosophy. Classify the Doctor of Philosophy degree according to the student's major field of study. Thus, a Ph.D. in Chemistry should be reported as a degree in Chemistry, NOT as one in Philosophy.

- (c) Majors of Students Prepared to Teach. The general rule is to classify degrees according to the major area of specialization. This means, in general, that degrees of students who have prepared to teach an academic subject, such as English, biology, mathematics, or foreign languages, should be reported as appropriate in Letters, Biological Sciences, Mathematics, and Foreign Languages and NOT in Education. On the other hand, the degrees of students who have prepared to teach such special subjects as agriculture, art, music, etc. should be reported in Agricultural education (0899-1), Art education (0831), and Music education (0832).
- (d) Split and Double Majors. When a student graduates with a split major or a double major e.g., in Spanish and French report the degree either in the area of greater specialization or as half a degree (.5) in French and half a degree (.5) in Spanish. (If the split or double major involved Spanish and an unlisted language, the second language should be reported in Other, specify (1199)). Similarly in the case of a student with a split or double major in Biology and Chemistry, report the degree in the area of greater specialization or as (.5) degree in Biology and (.5) degree in Chemistry.
- (e) Unlisted Fields of Study. When classifying a specialty which does not seem to fit into the list, the institution has

- two choices: (1) it can be listed by name under "other" if it represents an unlisted specialty, or (2) it can be placed in a "general" category if it covers several listed specialties.
- (f) General Majors. The term general major is used to designate diversified curriculums within an area of study. Ordinarily, degrees based on a general major should be reported in one of the general categories of the report-form, such as Physical sciences, general (1901); Social sciences, general (2201); Humanities and social sciences (4903), etc. Thus a degree based on concentration in History-Government-Economics should be reported in Social sciences, general.
- (g) Interdisciplinary Studies. Code 4999 is for reporting fields of study which represent two or more broad discipline divisions; for example, Mass Communications, encompassing segments of psychology, education, business, journalism, social sciences, fine arts, etc., should be reported here. Specify the name of the interdisciplinary study when reporting in 4999.
- (h) Before submission, please verify that the specialty subtotals (for example, lines 22, .33, and 52, etc.) are the sum of the specified preceding lines for every column (columns (4) through (9).
